# WHY US?

### Controlled with mobile app

We created special app to control your Laser Maze. Get access whenever and wherever you please.

### Cashier control and Stats

You can see full played games stats for any day - number of plays, wins, losses, played time and result.

### Two different game modes

Possibility for a two-player mode. Twice as many customers.

### Regular app updates

Get new features and improvements for FREE!

### Easy-to-use control panel

Difficulty level settings, your own soundtracks, interface settings.

### Remote access, fast tech support

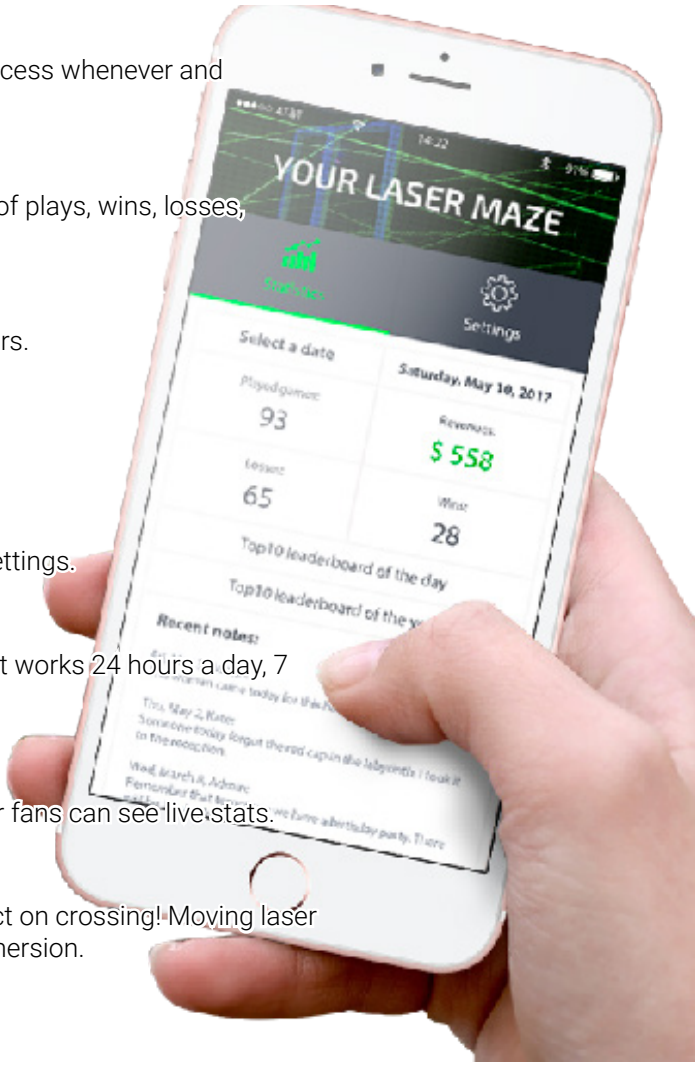

Diagnostics conducted using remote access. Tech support works 24 hours a day, 7 days a week.

### Touchscreen for players

Players can choose difficulty level for themselves and their fans can see live stats.

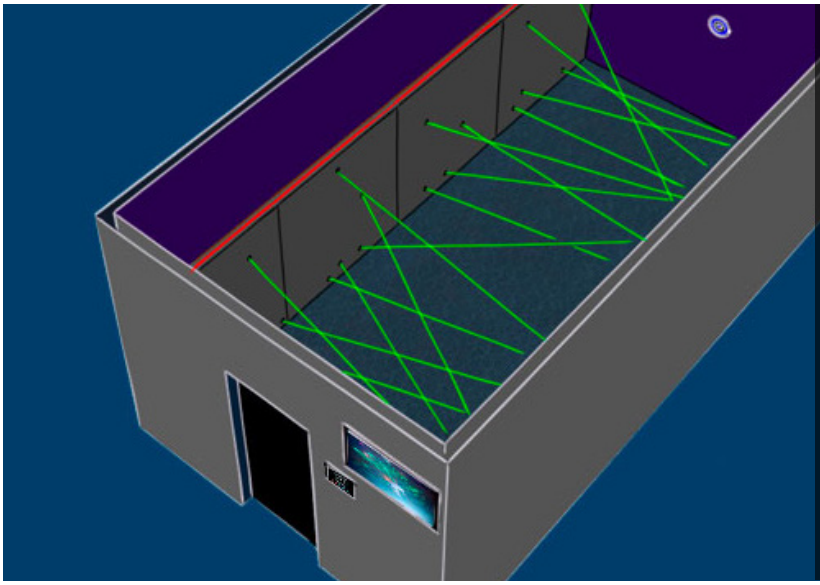

### Moving laser beams

We create Laser Mazes with moving laser beams that react on crossing! Moving laser beams establish new interactivity level - full gameplay immersion.

---

**Investment return in 2 month**

**Net profit: 8050$ per month**

**Annual profitability:505%**

# FAQ

### What is package delivery time?

Producing one maze takes 1-2 weeks. Standard delivery time is about 1 week.

### How to install laser maze?

You can install it yourself using our instruction.

You can order our installation. Our specialist can install it in 3-5 days depending on ordered option.

### Is there warranty?

There is 1-year warranty on our product and you can prolong it.

### How much does average game costs?

Depending on place and city size it is about 5-7$.

### What is average game time?

Average game lasts 1-1.5 minutes.

Max game time is 2-3 minutes and you can customize it.

Customizing is possible with your control panel.

### How many players can play at the same time?

Usually, laser maze is a single-player game. In our laser maze there is an additional two-player mode.

### What is target audience of Laser Maze?

First of all - children from 3 till 15 y.o.

Stats shows that 65-75% are children 3-15 y.o, 15-20% college students, 5-10% others.

### Is it safe?

Yes. Our Laser Mazes are up to the world standarts. We use lasers that complies with max permitted power (class 1 laser safety). Laser also turns off if touched.

### Where can I place Laser Maze?

Laser Maze can be placed indoors or outdoors:

Malls

Bowlings

Laser tag arenas

Amusement parks

Cinemas

Trampoline parks

Fairs

### Is it possible to order a Laser Maze with the currency detector?

Yes it is. It can be either banknotes acceptor or coin/ game cards acceptor.

We do not recommend this option especially if your maze located far from your control because of potential vandalism acts.

### Why do you create mazes with exactly green beams?

According to humans' biology, green color is very bright for human's eye. Green lasers are 10-20 times as bright than red or blue ones.

So due to safety limitations it is more effective to use green modules.

### Game process

Player (or two) comes into the Laser Maze room and gets through the web full of laser beams. Beam turns off if crossed and activates the light and sound alarm, while outside touchscreen shows the crossed beam. Through the process player passes checkpoints (pushes buttons), solves puzzles and comes out through the same door as they came in. Usual quest lasts about 2-3 minutes (more if puzzle option is chosen).

### How much power is needed to maintain Laser Maze?

Fog machine takes 900W and 400W power supply for the remaining equipment.

The equipment used in our Laser Maze has an operating voltage of 5V and 12V. Excluding UV-lights, audio speakers and the fog-machine.

# INSTALLATION

You can install Laser Maze yourself following our instructions.

**Or you can order our installation.**

**Price depends on your package.**
**All the materials and implements included in the price.**
**Installation time: 3-6 days.**

Technical requirements for laser maze room:
- Walls and ceiling painted in black.
- Two power outlet sockets: at the beginning and at the end of the room.
- Fire heat detectors are extremely necessary (fire smoke detectors will be triggered with the fog machine)
- Rigid floor. We recommend to cover it with carpet.

Laser maze power requirements are about 500W + 900W fog machine.

# WHAT TO DO NOW:

1. You tell us about your desire to buy laser maze. We discuss all supply details and finding the best offer.
2. Contract approval and signing.
3. 50% prepayment.
4. We produce and test equipment (about 1 week avg.).
5. Second 50% of payment.
6. We deliver your maze to your city.
7. In case you ordered an installation, package will be brought by our installer. Payment for installation shall be made after installation completion.
