Laser maze is

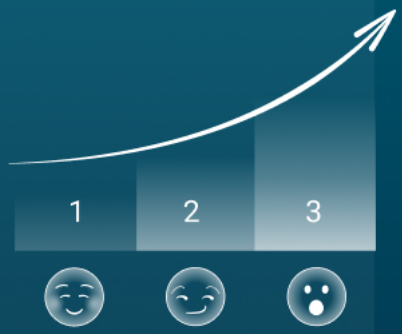

a small footprint attraction

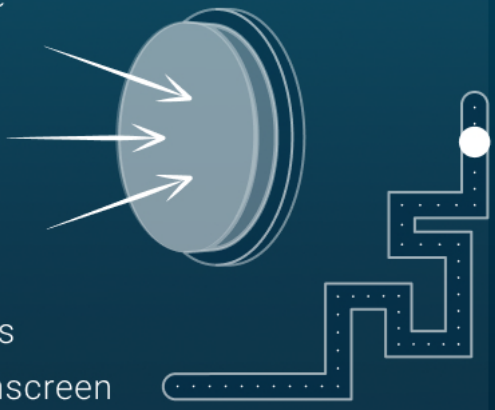

Player needs to get through the room filled with lots of laser beams without crossing them. Just like in spy movies.

Game process

How to play Laser maze game

- A player chooses the game mode and a difficulty level
- Presses the "START" button to begin the game
- Enters the Laser Maze room

- Gets through the web of the laser beams
- A laser beam turns off if crossed and activates the light and sound alarm, while outside touchscreen shows the number of the beams crossed and time left

- Throghout the game process the player goes from checkpoint to checkpoint (pressing the buttons in sequence) and solves puzzles
- The player wins if he passed all the checkpoints in time and haven't crossed too many lasers

Why us?

2 years warranty
We developed the laser mazes from scratch and we manufacture them in-house. This allowed us to choose cost-effective advanced technology stack and totally control the manufacturing process. Thus we made it highly reliable and still affordable.

Controlled with mobile app
We created special app to control your Laser Maze. Get access whenever and wherever you please. Get new features and improvements for FREE!

Cashier control and Stats
You can see full played games stats for any day - number of plays, wins, losses, played time and result.

Two different game modes
Possibility for a two-player mode. Twice as many customers.

Easy-to-use control panel
Difficulty level settings, your own soundtracks, interface settings.

Remote access, fast tech support
Tech support using remote access works 24 hours a day, 7 days a week.

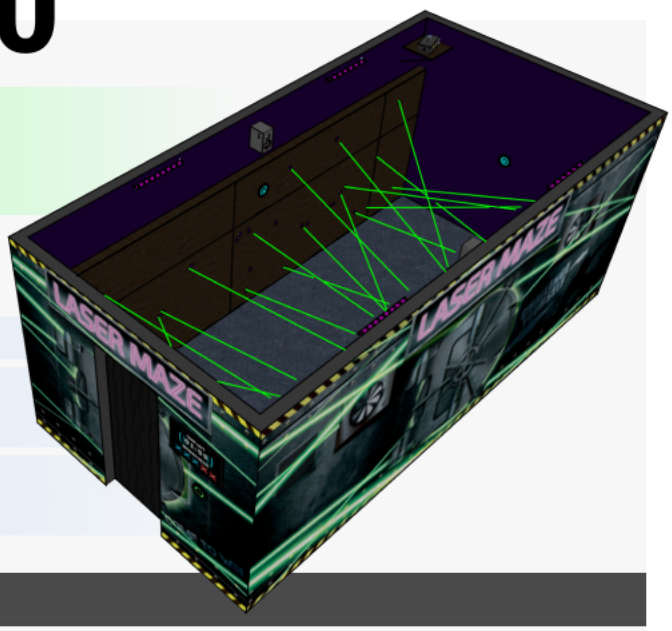

Touchscreen for players
Players can choose difficulty level for themselves and their fans can see live stats.

Moving laser beams
We create Laser Mazes with unique moving laser beams technology! Moving laser beams establish new interactivity level - full gameplay immersion.

Starter 20+0

(Signboard + video on screen + glowing door)

Installation

You can install Laser Maze by yourself following our detailed instructions.
Or you can order our installation service.

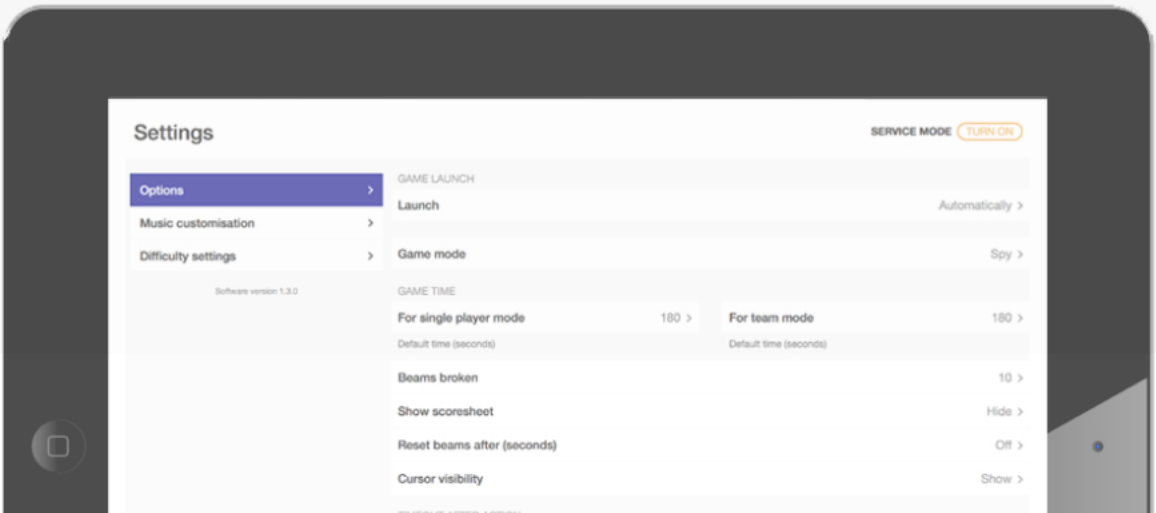

Technical requirements for laser maze room:
- Walls and ceiling painted in black.
- Three power outlet sockets: at the beginning and at the end of the room.
- Fire heat detectors are highly recommended (fire smoke detectors will be triggered with the fog machine)
- Rigid floor. We recommend to cover it with carpet.
- Laser maze power requirements are about 500W plus 1200W for a fog machine.

WHAT TO DO NOW:
1. Tell us what package have you chosen. We discuss all supply details and find the best offer.
2. Contract approval and signing.
3. 50% prepayment.
4. We produce and test equipment (about 1 week avg.).
5. Second 50% of payment.
6. We deliver your maze to your city.
7. In case you ordered an installation, package will be brought by our installer. Payment for installation shall be made after installation completion.

Price depends on your package and location

Installation time: 3-7 days

FAQ

What is package delivery time?
Producing one maze takes 1-2 weeks. Standard delivery time is about 5-8 days.

How to install a laser maze?
You can install it yourself using our detailed installation guide and 24/7 remote tech support. And you can order our installation. Contact us for more details.

Is there warranty?
There is 2-year warranty on our product and you can prolong it.

How much does average game costs?
Depending on place and city size it is about 3-9$.

What is average game time?
Average game lasts 1-1.5 minutes. Max game time usually 2-3 minutes, you can customize it. Customizing is possible with your control panel.

How many players can play at the same time?
Usually, laser maze is a single-player game. We have co-op modes in our PRO and Ultimate packages (up to 4 players in Ultimate package).

What is target audience?
First of all - children from 3 to 15 y.o. Stats shows that 65-75% are children 3-15 y.o, 15-20% college students, 5-10% others.

Is it safe?
Yes. Our Laser Mazes are up to the world standarts. We use lasers that comply with max permitted power (class 3a laser safety). Laser also turns off if touched.

Where can I place a Laser Maze?
Laser Maze can be placed indoors or outdoors:
- Trampoline parks
- Laser tag arenas
- Malls
- Bowlings
- Amusement parks
- Cinemas
- Fairs

Is it possible to order a Laser Maze with a payment device?
Yes it is. It can be either bill acceptor or coin/game cards acceptor. We do not recommend this option if your maze located far from your control because of potential vandalism acts.

Why do you create mazes with exactly green lasers?
According to biology, green color is very bright for human's eye. Green lasers are 10-20 times brighter than red or blue ones.
So due to safety limitations it is more effective to use green laser modules.

How much power is needed to supply a Laser Maze?
Fog machine takes 900W and 400W power supply for the remaining equipment. The equipment used in our Laser Maze has an operating voltage of 5V and 12V. Excluding UV-lights, screens, audio speakers and the fog-machine.

Thematic design

Add thematic graphic design elements to your laser maze! Materials include: printed vinyl outside wrap, indoor fluorescent (Black Light reactive) stickers, music and sounds specially designed for each of our themes. This gives more public feedback, increases attractiveness and creates a WOW-effect.
All graphic elements are size adjustable.

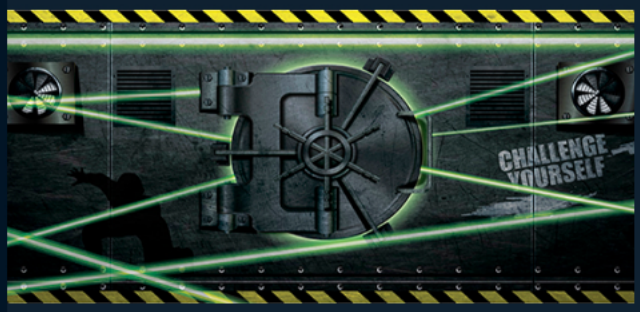

Experiment Laboratory

Purpose: to destroy the experimental dangerous virus. Get through the protection system, turn off the alarm security, run destroying the virus.

Archaeologist House

Purpose: close the time portal. Get through the laser beams from the portal, collect all the crystals and close the time portal.

Bank Vault

Purpose: to steal the treasure. Get through the security guard, turn off the alarm and steal the treasure.
